

Zurich-Airport, November 2021

Instrument Shop

Dear business partners

Dear customers

As many of you already know by the end of 2021 we will terminate the operation of our Instrument Shop at Zurich Airport.

Nevertheless, our long-term instrument specialist Mr. Ernst Keller will remain at our disposal with his broad knowledge and expertise, though with limited capacity. To which extent will be known in the beginning of 2022 depending on the FOCA approval of the new location.

Tests and calibrations of most manufacturers' altimeters, digital instruments and flight displays will be further on performed by our company.

For the best possible processing of your order a prior notification under info@avionitec.ch or 043 816 44 39 is as of now imperative.

Our aim is to continue providing you with an excellent and rapid service for your aircraft instruments.

We shall keep you informed about any further developments on the matter.

Thank you in advance for your trust and understanding.

Best regards
Avionitec AG

Andy Stoll
